## EDUCATION

### Oregon State University

Ph.D. in Electrical and Computer Engineering

Minor in Artificial Intelligence

**Focus area:** Information Theory, Machine Learning, Neural Data Compression

Corvallis, OR, US

Dec. 2026 (Expected)

### Oregon State University

M.S. in Electrical and Computer Engineering

Corvallis, OR, US

Dec. 2024

**Thesis:** *On Minimizing Symbol Error Probability using Beamforming in MIMO Gaussian Wiretap Channels*

## RESEARCH INTERESTS

**Intersection of information theory and machine learning:** Rate-distortion-perception representation for lossy compression, neural data compression, representation learning.

**Wireless communications and networks:** Signal processing, optimization, and machine learning for advanced MIMO communication systems, physical layer security for MIMO, beamforming techniques, wireless networking and technology for 5G/6G.

**Free-space quantum key distribution networks:** Design, analysis, and optimization of link-layer retransmissions and relaying techniques.

## RESEARCH EXPERIENCE

### Research Assistant, Communications and Signal Processing Group

Oregon State University

Dec. 2022 - Present

Corvallis, OR, US

**Advisor:** Prof. Thanh Nguyen and Prof. Bella Bose

**Topics:** Representation learning, neural data compression, statistical signal processing and Bayesian inference, non-convex optimization, wireless communications, physical layer security.

**Project:** *Universal rate-distortion-classification representations for lossy compression*

**Sponsor:** National Science Foundation (NSF, US), Grant CCF-2417898.

- Develop a universal representation framework in lossy compression to handle multiple distortion-classification tradeoffs with a single encoder.
- Prove the approximate achievability of the universal rate-distortion-classification function using theoretical information-theoretic methods.
- Implement and evaluate novel deep learning algorithms for classification-enhanced neural image compression models (using Autoencoder + GAN + CNN Classifier) on MNIST/ SVHN datasets with PyTorch, showcasing minimal performance loss compared to designing separate encoders for each objective.
- **Outputs:** 1 accepted conference paper & 1 journal paper manuscript [1], [2].

**Project:** *Design and Security Analysis of Symbol Error Probability-based Beamforming in MIMO Gaussian Wiretap Channels*

- Formulated a mathematical model and PHY signal design (binary antipodal signals and M-ary detection schemes) and proposed a novel low-complexity algorithm utilizing KKT conditions, generalized eigen-decomposition, and projected gradient descent.
- Conducted numerical experiments in MATLAB to evaluate the proposed beamforming scheme, analyzed results, and authored the paper.
- **Outputs:** 1 published conference paper & 1 journal paper submission [3], [4].

### Machine Learning Research Intern, Applied Artificial Intelligence Initiative

Deakin University

Jul. 2025

Burwood, Australia

**Mentor:** Prof. Mohamed Abdelrazek

**Project:** *AI Agentic Negotiation*

- Conduct research on AI agentic negotiation, focusing on how large language models (LLMs) perform in multi-agent bargaining and argumentation scenarios under uncertainty.
- Identify and analyze key negotiation strategies from existing literature, and evaluate the capabilities of various LLMs in executing these strategies.

- Design experimental setups to simulate negotiation dialogues, incorporating belief updates, offer-counteroffer dynamics, and strategic reasoning.

**Research Assistant, Optical Communications Research Group** Mar. 2019 - Mar. 2023  
 Posts and Telecommunications Institute of Technology Hanoi, Vietnam  
**Advisor:** Prof. Vuong Mai and Prof. Ngoc Dang  
**Topics:** Free-space quantum key distribution network, optical communication systems.  
**Project:** *Design and Security Analysis of Satellite-based Free-Space Quantum Key Distribution Systems for Wireless and Vehicular Networks*  
**Sponsor:** National Foundation for Science and Technology Development (NAFOSTED, Vietnam), Grant No. 102.02-2019.08

- Innovated project ideas by expanding terrestrial binary phase shift keying (BPSK) modulation/direct-detection/QKD systems to satellite-based quadrature phase shift keying (QPSK) modulation/QKD systems.
- Designed and analyzed satellite-based QKD systems, including link-layer retransmissions, relaying techniques, and performance evaluations under atmospheric turbulence-induced phase fluctuations.
- Executed numerical experiments in MATLAB to assess system performance, analyzed results, and authored research papers.
- **Outputs:** 2 published conference papers & 2 published journal papers [5], [6], [7], [8].

## INDUSTRY

EXPERIENCE

**Mobifone Telecommunications Corporation** Sept. 2020 - Dec. 2020  
 Networking and Communication Engineer Intern Hanoi, Vietnam

- Conducted an in-depth study of technical documents to gain expertise in the 4G/LTE protocol and its applications in the telecommunications industry.
- Investigated and analyzed system and network operations, gaining valuable insights into network management and monitoring systems.

**Viettel High Technology Industries Corporation**  
*Research and Development Intern*

Jun. 2019 - Sept. 2019  
Hanoi, Vietnam

- Completed a competitive summer course on 4G/LTE Protocol Development, awarded a certificate for the top-performing project.
- Developed a multi-client TCP user client-server system to handle login, score retrieval, and logout requests over multi-threaded processes:
  - Designed a TCP server to authenticate clients and respond with scores, using unique threads for each client to handle simultaneous requests [Github Link].
  - Tools/Technologies: C, TCP/UDP Library, Linux, Functional Programming.

**TEACHING  
EXPERIENCE**

**Teaching Assistant, Electrical Engineering and Computer Science** Mar. 2022 - Present  
Oregon State University Corvallis, OR, US

- **Courses:** ECE 353 - Introduction To Probability and Random Signals (3 terms), ECE 351 - Signals and Systems I (2 terms), ECE 352 - Signals and Systems II (3 terms), CS 372 - Introduction to Computer Networks (1 term), ENGR 201 - Electrical Fundamentals I (4 terms), ECE 271 - Digital Logic Design (1 term), ENGR 202 - Electrical Fundamentals II (2 terms).
- **Responsibilities:** Grading assignments and exams, holding office hours and review sessions, and improving course materials.

**TECHNICAL  
SKILLS**

**Quantitative Research:** Mathematical Modeling, Optimization, Statistics and Probability Theory.  
**Programming Skills:** Python, MATLAB, C/C++, L<sup>A</sup>T<sub>E</sub>X.  
**Software Tools:** Pytorch, Tensorflow, MATLAB Toolboxes, CVX.

**TRAINING  
COURSES**

AI 539 - Introduction to Online Learning, AI 534 - Machine Learning, AI 535 - Deep Learning, AI 539 - Information Theory, AI 586 - Applied Matrix Analysis, AI 539 - Convex Optimization, ECE 565 - Estimation, Filtering, and Detection, CS 527 - Error-Correcting Codes, ECE 563 - Wireless Communications Networks, ECE 669 - Communications System Design, ECE 564 - Digital Signal Processing, ECE 560 - Stochastic Signals and Systems, ECE 550 - Linear Systems.

**AWARDS &  
HONORS**

NSF Student Travel Grant, AERPAW Spring Workshop – North Carolina State University 2025  
Graduate School's Scholarly Presentation Award – Oregon State University 2024  
SVTECH Scholarship – SV Technologies JSC 2021  
*Awarded to 5 outstanding students at the Posts and Telecommunications Institute of Technology*  
Second Prize, National Scientific Research Contest – Vietnam Ministry of Education and Training 2020  
First Prize, Scientific Research Contest – Posts and Telecommunications Institute of Technology 2019  
Second Prize in Physics – Provincial Excellent Student Competition, Vietnam 2012  
First Prize in Physics – School-Level Excellent Student Competition, Vietnam 2011, 2012, 2013

**REVIEWER  
SERVICE**

2025 IEEE Wireless Communications Magazine (1 paper), 2025 IEEE International Symposium on Information Theory (4 papers), 2024 IEEE Access (1 paper), 2024 IEEE Wireless Communications Magazine (1 paper), 2023 IEEE International Conference on Communications Workshops (1 paper).
